Build seamless training and research environment to overcome barriers between the humanities and sciences as well as regional and overseas barriers. In addition, promote women's participation (childcare, childbirth, care)

Build a seamless healthcare system encompassing health and hygiene issues in diversifying Asian countries

Notable achievements of the center

- Take a degree by the English course (International Course for Health Sciences)
- Undergraduate and graduate students dispatched overseas International Exchange
- Human resource development for countermeasures against the aging society in Vietnam with Hanoi Medical University under JICA's grassroots project (training of 12 occupational therapy instructors over 3 years)
- Developed a visualized research for nursing care in "mixed obstetric wards" into a joint research project with AIST, Ritsumeikan University, and Kobe University
- Conducted the School of Business Administration and Graduate School of Midwifery Management under the "Practical Hospital Management Human Resource Development Plan," a program for developing advanced medical personnel with problem-solving skills by the Ministry of Education, Culture, Sports, Science and Technology
- Molecular phylogenetic analysis of Indonesian HIV-1 variants and development of a safe drug discovery screening system for COVID-19
- Development of a VR-based postgraduate training program for dementia nursing and a competency scale for dementia nursing in Taiwan and Japan
- Elucidation of the actual situation and influencing factors of sarcopenia among diabetic patients in Taiwan and Japan
- Elucidation of the current status of sleep and care burden of family caregivers and its related factors in Taiwan, Japan, and Indonesia
